

MJ Hatfield

**Tenthredinidae**  
***Monostegia abdominalis***

larvae feeding on  
*Lysimachia ciliata*, fringed loosestrife  
Sawfly introduced from Europe & known to feed  
on various species of *Lysimachia*. When I worked  
on this about 1978, it was known from SE Canada  
and NE U.S. with records from only as far west as  
Ohio and Michigan. It has spread.

Dr. David Smith, research entomologist
